

## Unit 9. Educations and communication

### Forest quiz in Finnish schools

#### Description

National forest quiz (Metsävisa) is organized by the Finnish Forest Association (Suomen Metsäyhdistys) and the Biology and Geography Teachers' Union for grades 7-9 of comprehensive school. The idea is to raise awareness and interest to forest-related topics among students. The assignments range from species identification to applied material tasks, as well as to current topics. The assignments are also suitable for later teaching in several subjects. Participation in Metsävisa is free of charge.

**Course of the competition:** The teacher announces the students to the visa

The entire middle school, a certain grade level, an elective subject group, voluntary students or even a single student can participate. The quiz forms are mailed to the school. If desired, the teacher can prequalify the students with an electronic game. The most successful students then qualify for a paper test.

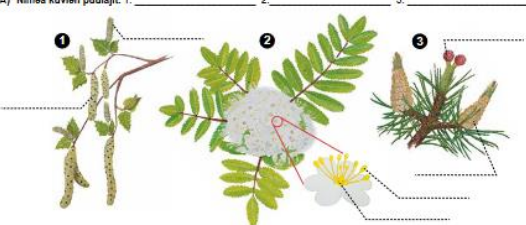

Nimi \_\_\_\_\_

Koulu \_\_\_\_\_

Pisteet \_\_\_\_\_ / 91 p.

**1 MET SIEMME PUULAJEJA**

A) Nimeä kuvien puulajit. 1. \_\_\_\_\_ 2. \_\_\_\_\_ 3. \_\_\_\_\_

/24 p.

An example form from 2020 quiz

#### School level competition

Pupils fill out the four-page competition form in class at their school. The teacher or the students themselves check the answers using the answer templates. The winner of the school will receive a birch tree with a visage and a diploma as a prize

#### Final

The 50 best school winners and their teachers will be invited to the final. The final is a two-day event and is done on the field

The final competition includes field assignments

#### Goals

The goal is to inspire and motivate comprehensive school students to forest-related topics

#### Impact

The quiz increases the knowledge and interest related to forests.
